**Dan Moser** is a professor and associate dean for academic programs in the College of Agriculture at Kansas State University. In this role, Moser directs all aspects of the undergraduate student experience, including student recruitment, course and curriculum development, student leadership activities, career placement, and alumni relations. He represents the college on several university-level committees and is currently chairman of AG-IDEA, a consortium of universities collaborating to offer online education programs.

Moser was previously the president of Angus Genetics Inc. and director of performance programs for the American Angus Association. During his tenure with the association, he administered genetic evaluation programs, genomic testing services, research initiatives, business activities, and member education efforts. For 20 years he served as a faculty member at the University of Georgia, the University of Nebraska-Lincoln, and Kansas State University.

Dr. Mosier earned his bachelor's degree in animal sciences from Kansas State University and his M.S. and Ph.D. in beef cattle genetics from the University of Georgia. He has given invited presentations or consultations in 38 U.S. states and eight foreign countries. He was formerly a director of the Beef Improvement Federation and is a fellow of the Food Systems Leadership Institute.
